

ALEKSANDR DOLINSKY

ABOUT ME

I am actively seeking new professional opportunities as a Front-End Developer, aiming to join a forward-thinking team where I can apply modern development practices, contribute to building exceptional user experiences, and continue growing both technically and creatively as a specialist.

PERSONAL WEBSITE

In this section, you'll find projects that reflect my style.

PROFESSIONAL EXPERIENCE

I build user interfaces with a strong focus on structure and user experience. I am fluent in JavaScript (ES5/ES6) and TypeScript, enabling me to write code that is both user-friendly and well-organized. In the React ecosystem, I work confidently with both class-based and functional components. I leverage state management, conditional rendering, and higher-order components to build scalable and reusable interfaces. Using React Hooks, I'm comfortable implementing both client-side (CSR) and server-side (SSR) rendering strategies to optimize performance.

On the data layer, I integrate GraphQL API via Apollo Client and Relay, and work with REST services using Fetch, Axios, SWR, and React Query. Beyond React, I have experience with Vue, taking advantage of its reactive framework, component-based architecture, Vue Router, and Vuex to create modern, maintainable SPA.

React Developer — ADMSS LTD

08/2022 — 05/2025

I was part of a cross-functional team that included a backend developer, a designer, and a QA specialist. I completed numerous cases (individual tasks) covering the full development cycle — from programming to testing. I worked on building two CRM systems based on React for a car dealership: a CRM for automating service processes — a solution that optimizes customer interactions, as well as internal business processes.

Front-end Developer — Matrix Agency LLC

02/2020 — 08/2022

Participated in the development of websites using modern JavaScript frameworks such as Vue and React. Collaborated closely with UX/UI designers to transform concepts and prototypes into intuitive, user-friendly, and visually appealing user interfaces. Ensured brand consistency and visual coherence across various platforms and devices by implementing design systems and components in accordance with company guidelines. Utilized frontend tools (Webpack, Babel, ESLint, Prettier) and build processes to optimize performance. Conducted cross-browser interface testing. Took part in code reviews, implementation of best practices, and automation of CI/CD processes for continuous integration and delivery of features.

EDUCATION

Open International University of Human Development "Ukraine"

(<https://uu.edu.ua/>)

Software specialist

Interregional Higher Vocational School of Communications

(<https://pkvfp.kiev.ua/>)

Radio technician
