ALEKSANDR DOLINSKY

ABOUT ME

I am actively seeking new professional opportunities as a Front-End Developer, aiming to join a forward-thinking team where I can apply modern development practices, contribute to building exceptional user experiences, and continue growing both technically and creatively as a specialist.

PERSONAL WEBSITE

In this section, you'll find projects that reflect my style.

PROFESSIONAL EXPERIENCE

I build user interfaces and have strong proficiency in JavaScript (ES5/ES6) and TypeScript. I work confidently with state management, conditional rendering, and component-based architecture. I'm comfortable implementing rendering strategies on both the client side (CSR) and server side (SSR).

On the data layer, I integrate GraphQL API using Apollo Client and Relay, and I work with RESTful services using Fetch, Axios, SWR, and React Query. In addition to React, I have experience with Vue, where I leverage its reactive framework and component-based architecture.

React Developer — ADMSS LTD

08/2022 — 05/2025

I was part of a cross-functional team that included a backend developer, a designer, and a QA engineer. I completed many tasks covering the full development cycle — from programming to testing. I worked on the development of two React-based CRM systems for a car dealership: one CRM for automating customer service processes — a solution aimed at optimizing client interactions — and another for internal business processes.

Front-end Developer — Matrix Agency LLC

02/2020 — 08/2022

I participated in development using Vue and React builders. I collaborated with UX/UI designers to transform concepts and prototypes into intuitive, user-friendly, and visually appealing user interfaces. I ensured consistency and brand alignment across platforms and devices by implementing design systems and components according to company guidelines. I utilized frontend tools and build processes to optimize performance. I conducted cross-browser interface testing and took part in implementing CI/CD automation for continuous integration and delivery of features.

EDUCATION

Open International University of Human Development "Ukraine" (https://uu.edu.ua/)

Software specialist

Interregional Higher Vocational School of Communications (https://pkvfp.kiev.ua/)

Radio technician
